

Bureau of Reclamation Strengthens Enterprise Functionality of Infolinx WEB

The U.S. Department of the Interior's Bureau of Reclamation supplements functionality of their enterprise physical records management application Infolinx WEB

Kensington, MD (Vocus/PRWEB) March 15, 2011 -- Infolinx System Solutions, a leading provider of enterprise physical records management software, announced the procurement of application enhancements by the Bureau of Reclamation (BoR), increasing the functionality of their enterprise physical records management application, Infolinx WEB.

Furthering their adoption of records management best practices, BoR continues to extend their physical records management capability with the inclusion of new features such as improved audit trail management, location reconciliation, and application-centric instant messaging. Bundled into a completely redesigned interface based on Web 2.0 standards, the enhanced solution increases application performance while allowing BoR to respond effectively and efficiently to users' needs.

"We applaud BoR's focus on records management," said Tim Butler, Infolinx Managing Director. "Their continued implementation of best practices not only protects the integrity of their corporate records from creation through disposition, but enables them to adapt to the challenges of new regulations and programs rapidly." The latest Infolinx WEB release includes advanced retention and disposition, as well as legal hold and citation management capability.

About Infolinx
