

Infolinx Partners with Laserfiche for Total Enterprise Records Solution in Ottawa, Canada

Physical and Electronic Document Management for School Board Corporate Records

Kensington, MD (Vocus/PRWEB) April 05, 2011 -- Infolinx System Solutions continues its working partnership with Laserfiche to provide both a unified physical and electronic corporate records solution for the largest school board in Ottawa, Canada. The school board is responsible for overseeing a thriving and progressive educational system, which serves more than 70,000 students in 146 schools and sites and nearly 7,000 employees. The integrated solution manages the full life-cycle of corporate records, regardless of media type, while streamlining the processes for managing documents and workflow.

The transparent records management application will provide the electronic solution for the board services such as minutes, budgets and correspondence while the physical records tracking will be focused primarily on the student records. The enterprise application includes robust security features and advanced retention functionality.

“We are excited to empower this client to use technology effectively to support a total solution for their enterprise records management,” said Chip Benson, Director of New Business Development. “ We partnered with Laserfiche Reseller MC Imaging’s President Frank MacDonald out of London, Ontario, to architect a deep integration between the Laserfiche products and Infolinx Web to enable enterprise corporate records management within a single solution.”

Organizations across North America and Europe, continuing to require contemporary, technology-based physical records management solutions, are realizing immediate return on investment as they migrate from antiquated records management software and processes to contemporary online solutions. The rapid deployments of secure, scalable, browser-based applications like those found in Infolinx WEB are increasingly essential. Having provided records management consultation and software services since 1987, Infolinx has extensive experience partnering with various solutions providers to implement strategic and scalable records management applications.
