

WHY RECORDS & INFORMATION MANAGEMENT IS CRITICAL FOR HEALTHCARE

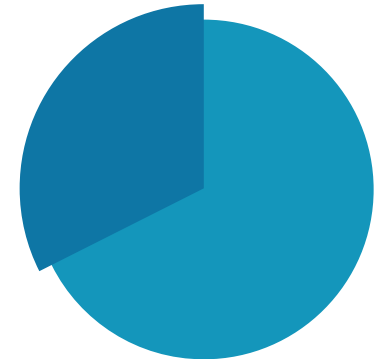

Labor costs spent searching for **each misplaced** document

All patient records entered in one database to **track record location**

3 of every 10 lab tests are reordered due to loss during transfer

System to keep audit trail to **track transfer activity** of every record

70% of individuals report **inability to access** lab results in paper or electronic format

Proper records management ensures secure and timely access to records

ENHANCING **HEALTHCARE** RECORDS & INFORMATION MANAGEMENT

- Automate record classification, retention, and disposition
- Locate, transfer, and track any record
- Migrate legacy data and connect disparate data repositories
- Ensure regulatory compliance and document security
